Noon	Para Optometric program concludes

Consider Certification!

Paraoptometric certification is a program developed by a respected panel of American Optometric Association paraoptometricians and optometrists, created to encourage continuing education and knowledge as the field of optometric assisting grows.

The AOA offers four certified programs for optometric staff. Each program requires successful completion of an examination prepared and administered by the Commission on Paraoptometric Certification (CPC) with the assistance of Professional Testing Corporation. The purpose of the examinations is to assure a level of knowledge to perform the functions necessary to each certified designation. Recipients must renew their certification every three years to remain current in their field.

The CPOTM, CPOATM, and CPOTTM examinations are accredited by the National Commission for Certifying Agencies (NCCA). The NCCA accreditation serves as a benchmark on how organizations should conduct certification and clearly distinguishes the excellence and value of CPC certification.
